Experience

WEB DEVELOPER

INFOXPRESSION 2022, USICT

Jun 2022 – Present

Dwarka, DL

- Created an amazing website with a team of 6 for the second largest tech fest (InfoXpression) in India hosted by a university.
- Used many libraries and framework and learned some back-end technologies.

WEB TEAM

IEEE, USICT

Aug 2022 – Present

Dwarka, DL

- Made many websites for events and mini fests.

Competitions

MID LEVEL EVENT

CAPTURE THE FLAG

Oct 2022

Dwarka, DL

- We had a team of two people. Then we need to open a chain of pdfs. The password to open the next pdf can be found out by the previous one. There were some hints and clues to solve different tasks.
- After opening all the 7 pdfs, we won the first prize of 5000₹.

Recent Projects

PORTFOLIO

My personal portfolio with all my details and projects mentioned in it also comes with a theme change button (the user can switch between light and dark theme). A fully responsive and interactive website designed using Figma.

OMNIFOOD

A fully responsive (works with devices of any size) online meal delivery website where people can choose different plans and meal options and can order the food. (Only Frontend)

PIG GAME

An interesting and interactive game made using JavaScript, HTML, and CSS. Players can roll the dice and hold their score if needed. If the player gets 1 on the dice, he loses all their current score and the next player will get the chance. The first to score 100 points wins.

UNIVERSITY WEBSITE

A responsive University Website with multiple pages and google maps for location.

LIECA CAMERA

A great looking and modern webpage made using sass and HTML, designed using Figma.
